CONTENTS OF VOLUME 30

Memorial Articles

BENJAMINI, YOAV AND BRAUN, HENRY. John W. Tukey's contributions to multiple comparisons 1576–1594

BRAUN, HENRY AND BENJAMINI, YOAV. John W. Tukey's contributions to multiple comparisons 1576–1594

BRILLINGER, DAVID R. John W. Tukey: His life and professional contributions 1535–1575

BRILLINGER, DAVID R. John W. Tukey's work on time series and spectrum analysis 1595–1618

DEMPSTER, A. P. John W. Tukey as "Philosopher" 1619–1628

FRIEDMAN, JEROME H. AND STUETZLE, WERNER. John W. Tukey's work on interactive graphics 1629–1639

HUBER, PETER J. John W. Tukey's contributions to robust statistics 1640–1648

SPEED, T. P. John W. Tukey's contributions to analysis of variance 1649–1665

STUETZLE, WERNER AND FRIEDMAN, JEROME H. John W. Tukey's work on interactive graphics 1629–1639

VAN DER VAART, AAD. The statistical work of Lucien Le Cam ... 631–682

YANG, GRACE L. Lucien Le Cam 1924–2000 617–630

The publications and writings of John W. Tukey 1666–1680

The publications and writings of Lucien Le Cam 683–687

Articles

ADROVER, JORGE AND YOHAI, VÍCTOR. Projection estimates of multivariate location 1760–1781

ANDERSON, T. W. Canonical correlation analysis and reduced rank regression in autoregressive models 1134–1154

ANGO NZE, PATRICK, BÜHLMANN, PETER AND DOUKHAN, PAUL. Weak dependence beyond mixing and asymptotics for nonparametric regression 397–430

BAI, Z. D., HU, FEIFANG AND ROSENBERGER, WILLIAM F. Asymptotic properties of adaptive designs for clinical trials with delayed response 122–139

BAR-LEV, SHAUL K., BSHOUTY, DAOUD AND LETAC, GÉRARD. Normal, gamma and inverse-Gaussian are the only NEFs where the bilateral UMPU and GLR tests coincide 1524–1534

BEDFORD, TIM AND COOKE, ROGER M. Vines—a new graphical model for dependent random variables 1031–1068

BERGSMA, WICHER P. AND RUDAS, TAMÁS. Marginal models for categorical data 140–159

BESAG, JULIAN. Comment on "What is a statistical model?" by Peter McCullagh 1267–1277
BICKEL, PETER J. Comment on "What is a statistical model?" by Peter McCullagh 1277–1278
BIRGÉ, LUCIEN. Discussion of "Random rates in anisotropic regression," by M. Hoffmann and O. Lepski 359–363
BRØNS, HANS. Comment on "What is a statistical model?" by Peter McCullagh 1279–1283
BROWN, LAWRENCE D., CAI, T. TONY AND DASGUPTA, ANIRBAN. Confidence intervals for a binomial proportion and asymptotic expansions 160–201
BROWN, LAWRENCE D., CAI, T. TONY, LOW, MARK G. AND ZHANG, CUN-HUI. Asymptotic equivalence theory for nonparametric regression with random design 688–707
BROWN, LAWRENCE D. AND LIN, YI. Discussion of "Random rates in anisotropic regression," by M. Hoffmann and O. Lepski 363–370
BSHOUTY, DAOUD, LETAC, GÉRARD AND BAR-LEV, SHAUL K. Normal, gamma and inverse-Gaussian are the only NEFs where the bilateral UMPU and GLR tests coincide 1524–1534
BÜHLMANN, PETER, DOUKHAN, PAUL AND ANGO NZE, PATRICK. Weak dependence beyond mixing and asymptotics for nonparametric regression 397–430
BÜHLMANN, PETER AND YU, BIN. Analyzing bagging 927–961
BUTLER, RONALD W. AND WOOD, ANDREW T. A. Laplace approximations for hypergeometric functions with matrix argument 1155–1177
CAI, T. TONY, DASGUPTA, ANIRBAN AND BROWN, LAWRENCE D. Confidence intervals for a binomial proportion and asymptotic expansions 160–201
CAI, T. TONY, LOW, MARK G., ZHANG, CUN-HUI AND BROWN, LAWRENCE D. Asymptotic equivalence theory for nonparametric regression with random design 688–707
CANDÈS, EMMANUEL J. AND DONOHO, DAVID L. Recovering edges in ill-posed inverse problems: Optimality of curvelet frames 784–842
CARTER, ANDREW V. Deficiency distance between multinomial and multivariate normal experiments 708–730
CAVALIER, L., GOLUBEV, G. K., PICARD, D. AND TSYBAKOV, A. B. Oracle inequalities for inverse problems . 843–874

CHEN, ZHIQIANG AND TYLER, DAVID E. The influence function and maximum bias of Tukey's median 1737–1759
CHIAROMONTE, FRANCESCA, COOK, R. DENNIS AND LI, BING. Sufficient dimension reduction in regressions with categorical predictors 475–497
CLAESKENS, GERDA AND HALL, PETER. Effect of dependence on stochastic measures of accuracy of density estimators 431–454
COHEN, ARTHUR, KEMPERMAN, J. H. B. AND SACKROWITZ, HAROLD. On the bias in estimating genetic length and other quantities in simplex constrained models 202–219
COOK, R. DENNIS AND LI, BING. Dimension reduction for conditional mean in regression 455–474
COOK, R. DENNIS, LI, BING AND CHIAROMONTE, FRANCESCA. Sufficient dimension reduction in regressions with categorical predictors 475–497
COOKE, ROGER M. AND BEDFORD, TIM. Vines—a new graphical model for dependent random variables 1031–1068
DASGUPTA, ANIRBAN, BROWN, LAWRENCE D. AND CAI, T. TONY. Confidence intervals for a binomial proportion and asymptotic expansions 160–201
DEY, ALOKE AND SUEN, CHUNG-YI. Optimal fractional factorial plans for main effects and specified two-factor interactions: A projective geometric approach 1512–1523
DI NUNNO, GIULIA, REGAZZINI, EUGENIO AND GUGLIELMI, ALESSANDRA. Theory and numerical analysis for exact distributions of functionals of a Dirichlet process 1376–1411
DONOHO, DAVID L. AND CANDÈS, EMMANUEL J. Recovering edges in ill-posed inverse problems: Optimality of curvelet frames 784–842
DOUKHAN, PAUL, ANGO NZE, PATRICK AND BÜHLMANN, PETER. Weak dependence beyond mixing and asymptotics for nonparametric regression 397–430
DUDLEY, R. M. AND HAUGHTON, D. Asymptotic normality with small relative errors of posterior probabilities of half-spaces ... 1311–1344
EFROMOVICH, SAM. Discussion of "Random rates in anisotropic regression," by M. Hoffmann and O. Lepski 370–374
FAN, JIANQING AND LI, RUNZE. Variable selection for Cox's proportional hazards model and frailty model 74–99
FINNER, H. AND ROTERS, M. Multiple hypotheses testing and expected number of type I errors 220–238

FINNER, H. AND STRASSBURGER, K. The partitioning principle: A powerful tool in multiple decision theory 1194–1213
FRASER, D. A. S. AND REID, N. Comment on "What is a statistical model?" by Peter McCullagh 1283–1286
GEIGER, DAN AND HECKERMAN, DAVID. Parameter priors for directed acyclic graphical models and the characterization of several probability distributions 1412–1440
GENON-CATALOT, VALENTINE, LAREDO, CATHERINE AND NUSSBAUM, MICHAEL. Asymptotic equivalence of estimating a Poisson intensity and a positive diffusion drift 731–753
GERVINI, DANIEL AND YOHAI, VÍCTOR J. A class of robust and fully efficient regression estimators 583–616
GOLUBEV, G. K., PICARD, D., TSYBAKOV, A. B. AND CAVALIER, L. Oracle inequalities for inverse problems 843–874
GUGLIELMI, ALESSANDRA, DI NUNNO, GIULIA AND REGAZZINI, EUGENIO. Theory and numerical analysis for exact distributions of functionals of a Dirichlet process 1376–1411
HALL, PETER AND CLAESKENS, GERDA. Effect of dependence on stochastic measures of accuracy of density estimators 431–454
HALL, PETER AND PARK, BYEONG U. New methods for bias correction at endpoints and boundaries 1460–1479
HALL, PETER, PENG, LIANG AND TAJVIDI, NADER. Effect of extrapolation on coverage accuracy of prediction intervals computed from Pareto-type data 875–895
HALLIN, MARC AND PAINDAVEINE, DAVY. Optimal tests for multivariate location based on interdirections and pseudo-Mahalanobis ranks 1103–1133
HAUGHTON, D. AND DUDLEY, R. M. Asymptotic normality with small relative errors of posterior probabilities of half-spaces ... 1311–1344
HECKERMAN, DAVID AND GEIGER, DAN. Parameter priors for directed acyclic graphical models and the characterization of several probability distributions 1412–1440
HELLAND, INGE S. Comment on "What is a statistical model?" by Peter McCullagh 1286–1289
HOBERT, JAMES P. AND SCHWEINSBERG, JASON. Conditions for recurrence and transience of a Markov chain on $\mathbb{Z}^+$ and estimation of a geometric success probability 1214–1223
HOFFMANN, M. AND LEPSKI, O. Random rates in anisotropic regression 325–358
HOFFMANN, M. AND LEPSKI, O. Rejoinder 390–396

HU, FEIFANG, ROSENBERGER, WILLIAM F. AND BAI, Z. D. Asymptotic properties of adaptive designs for clinical trials with delayed response 122–139
HUBER, PETER J. Comment on "What is a statistical model?" by Peter McCullagh 1289–1292
JIANG, JIMING, LAHIRI, P. AND WAN, SHU-MEI. A unified jackknife theory for empirical best prediction with M-estimation 1782–1810
JIANG, WENXIN. On weak base hypotheses and their implications for boosting regression and classification 51–73
JONES, M. C., PARK, B. U. AND KIM, W. C. On local likelihood density estimation 1480–1495
JUDITSKY, ANATOLI AND NEMIROVSKI, ARKADI. On nonparametric tests of positivity/monotonicity/convexity 498–527
KALMAN, RUDOLF. Comment on "What is a statistical model?" by Peter McCullagh 1292–1294
KEMPERMAN, J. H. B., SACKROWITZ, HAROLD AND COHEN, ARTHUR. On the bias in estimating genetic length and other quantities in simplex constrained models 202–219
KIM, W. C., JONES, M. C. AND PARK, B. U. On local likelihood density estimation 1480–1495
KOLTCHINSKII, V. AND PANCHENKO, D. Empirical margin distributions and bounding the generalization error of combined classifiers 1–50
LAHIRI, P., WAN, SHU-MEI AND JIANG, JIMING. A unified jackknife theory for empirical best prediction with M-estimation 1782–1810
LAREDO, CATHERINE, NUSSBAUM, MICHAEL AND GENON-CATALOT, VALENTINE. Asymptotic equivalence of estimating a Poisson intensity and a positive diffusion drift 731–753
LEDOIT, OLIVIER AND WOLF, MICHAEL. Some hypothesis tests for the covariance matrix when the dimension is large compared to the sample size 1081–1102
LEPSKI, O. AND HOFFMANN, M. Random rates in anisotropic regression 325–358
LEPSKI, O. AND HOFFMANN, M. Rejoinder 390–396
LETAC, GÉRARD, BAR-LEV, SHAUL K. AND BSHOUTY, DAOUD. Normal, gamma and inverse-Gaussian are the only NEFs where the bilateral UMPU and GLR tests coincide 1524–1534
LI, BING, CHIAROMONTE, FRANCESCA AND COOK, R. DENNIS. Sufficient dimension reduction in regressions with categorical predictors 475–497
